

APPLIED MULTILEVEL MODELS

A PDHP workshop co-sponsored by Network on Life Course and Health Dynamics & Disparities (NIA 2R24AG045061)

Conducted by

Ryan Walters
Creighton University

Topics include:

- An overview of the multilevel model, including terminology and notation
- Understanding the difference between fixed and random effects
- How to include, interpret, and evaluate predictor variables across levels of analysis
- Hands-on practice with MLMs in Stata, SAS, SPSS, and R, using data from the American Community Survey

November 30, 2022

1 pm-5 pm via Zoom
